

NOUN /nʊk/

a corner or recess, especially
one offering seclusion or security.

OPEN WORKSPACES CAN CAUSE PROBLEMS

WHAT'S THE PROBLEM?

- DISRUPTIVE NOISE LEVELS
- LACK OF SMALL MEETING SPACE
- NO FLEXIBILITY TO ADAPT THE SPACE
- LITTLE PRIVACY OR PERSONAL SPACE
- FEELING CONSTANTLY 'ON-DISPLAY'
- INCREASED STRESS AND ISOLATION

A close-up photograph of a white fabric tag attached to a piece of orange and red textured fabric. The tag features the text 'ONE SIZE DOES NOT FIT ALL' in large, bold, black capital letters. Below this text are several small icons: a washing machine symbol with '30°C', a triangle symbol, a square symbol with a diagonal line, and a circle symbol. At the bottom of the tag, the text 'Von links bis' and 'repar' are partially visible.

Parts: EURODEKOR MFC, rating D-s2 d0

Soundproofing

Nook is intentionally open on one side. This openness combats the claustrophobia, staleness of air and overheating that enclosed pods encounter. Nook balances this openness and approachability with a surprising quietness once inside. Users have called it 'an oasis of calm'. It is not productive to put decibel readings on this effect as its not a simple quantifiable measurement. It is a feeling of intimacy and peace which delights and promotes focus, as Nook users will attest.

Self-Assembly

Nook can be built by a novice in approx. 60 minutes on the very first go. It can be disassembled in under 20 minutes.

Mobility

Nooks' heavy-duty lockable castors ensure 1-2 people can move a Nook easily. This portability, coupled with how Nooks work together, enables hyper-agile environments.

POWER & LIGHTING

POWERFUL CHARGING & LIGHTING CONTROL

1. Colour Adjustable Lighting to adjust lighting conditions to match the occupants mood, the task or a particular eye condition.
2. Surge Protected International Mains Sockets to plug in any device with 2 or 3 pin plugs.
3. Smart USB Outlets for simultaneously charging multiple tablet and phone devices
4. OPTIONAL Wireless Charging, enabling a cable-free world, in partnership with Aircharge™

Aircharge Wireless Charger

aircharge®

If your mobile device is Qi wireless charging enabled, then you're ready to go! Simply place it on the Aircharge wireless charger and it will start charging instantly.

NON-Qi DEVICE? Don't worry! Using the pre-installed Airbridge accessory we can enable any other non-Qi device to enjoy the freedom of wireless charging.

C - UPHOLSTERY

Included in the price of a Nook is your choice of any colour, per individual Nook, from the Camira – Xtreme fabric range.

Xtreme is a modern crepe weave fabric made from 100% recycled polyester, diverting waste from landfill & saving virgin raw materials. Its stretch properties, coupled with inherent flame resistance, durability and non-pilling properties make Xtreme a popular fabric.

FAQ

Q: What does one Nook include at base-price include?

A: Included in the cost of a single Nook is everything you need to get started with Nook – Nook shell on wheels, soundproofing upholstery in a colour of your choosing, seats and table, overhead lighting & task lamp, mains power & USB power points, rear wall lower half and rear wall upper half.

Q: What extra parts, options or accessories are available for Nook?

A: To the base Nook you can add: wireless power charging, branding or whiteboard rear wall.

Q: What finishes are available for a Nook?

A: UPHOLSTERY - Included in the price of a Nook is your choice of any colour, per individual Nook, from the Camira – Xtreme fabric range. Xtreme is a modern crepe weave fabric made from 100% recycled polyester, diverting waste from landfill & saving virgin raw materials. Its stretch properties, coupled with inherent flame resistance, durability and non-pilling properties make Xtreme a popular fabric. <https://www.camirafabrics.com/fabrics-and-samples/xtreme> - Note: Nook can be manufactured with almost any fabric, quoted on a case by case basis.

The Nook outer shell is usually white to match most environments. This can be changed in one of two ways.

OUTER SHELL WRAP - Nook can be completely or partially wrapped in a vinyl self-adhesive print. This allows Nook to be ‘dressed-up’ as any style to suit a design or interior. Some examples on the right. This can be done for an order as low as 1 Nook. Enquire for more info & pricing.

OUTER SHELL MATERIAL CHANGE - The outer shell and interior parts can also be changed to any finish which is available from the Egger Eurolight range. This can be done on a minimum order quantity of 10 Nooks.

Q: Does Nook come fully built of flat-packed?

A: Purchased Nooks are usually delivered flat-packed with a service to build onsite included. Hired Nooks for events usually come fully built, ready to wheel in to place, unless the location dictates that flat-packed & built onsite is required.

Q: Can Nook be easily assembled and disassembled?

A: Yes it takes around 20 minutes to take a Nook apart and 60 minutes to build one. Instructions are provided. Typical Nook delivery service includes an onsite build in a location of choice, testing & packaging removal.

Q: What is the soundproofing level of Nook?

A: Nook is intentionally open on one side. This openness combats the claustrophobia, staleness of air and overheating that enclosed pods encounter. Nook balances this openness and approachability with a surprising quietness once inside. Sitting in to a Nook removes much of the disturbing high frequency noise from the noise spectrum. It removes the strain of having to focus hard on a conversation and brings a sense of relief and relaxation. Users have called it ‘an oasis of calm’. It is not productive to put decibel readings on this effect as its not a simple quantifiable measurement. It is a feeling of intimacy and peace which adds to personal wellbeing and promotes focus.

Q: What are the Nook materials & fire ratings?

A: Nook is constructed of three main materials;

1. Fabric: Camira Xtreme, Fire Rating: Class 1IM
2. Shell: Egger, EUROLIGHT, Fire Rating: D-s1 d0
3. Parts: Egger, EURODEKOR MFC, Fire Rating: D-s2 d0
4. Wheels: Grey Non-marking Polyurethane Shore A92 Tyre

Certificates & info sheets for all materials [HERE](#).

Q: How should Nook be cleaned?

A: Use the cleaning guides located [HERE](#) for tips and best practices for maintaining Nook.

Q: Is it possible to add other branding to the Nook?

A: Yes. We offer a service to add branding to the Nook.

Q: What are the dimensions of a Nook?

NK120 is 200cm wide x 122cm deep x 196cm tall. Internal seat width 120cm.
NK90 is 200cm wide x 92cm deep x 196cm tall. Internal seat width 90cm.
NK60 is 200cm wide x 62cm deep x 196cm tall with 60cm seat width.

Q: What does a Nook weigh?

NK120 : 325kgs // NK90 : 250kgs // NK60 : 175kgs

Q: Is it possible to connect Nooks together?

A: Yes, Nooks are designed to work alone or together. There are a number of possible configurations:

1. Place two Nooks opposite each other with a gap in between for a super private 4-person meeting space
2. Remove the Rear Wall Upper of two Nooks and place back to back to communicate across Nooks
3. Remove the full Rear Wall and join many Nooks together to create larger meeting spaces
4. Place Nooks edge to edge in an array or at angles to create an enclosed group work or presentation space

Q: Are the Nook castors lockable?

A: All 4 heavy duty castor wheels are swivel and fully lockable. Its ideal but not necessary to lock all 4 wheels.

Q: What power requirements does the Nook have?

A: The Nook runs on a single standard Mains Plug. You will find this plug and lots of spare cable stored at the back at the bottom of the Nook.

Q: What power options does the Nook offer?

There are two power distribution units (PDUs) in the Nook. One for facilities and one for the user. The facilities PDU is surge protected and positioned under the base at the rear of the Nook. This PDU connects to the mains via a 4m cable. This PDU has a spare socket which can be used to connect Nooks together. Nook also comes with a desktop surge-protected PDU which contains international mains plug sockets and USB power points. This PDU can be removed from its housing and placed on the table to accommodate large power adaptors. Wireless Power Charging is an option extra.

Q: What is Wireless Power Charging?

A: Inductive charging (also known as wireless charging or [cordless](#) charging) uses an [electromagnetic field](#) to transfer [energy](#) between two objects through [electromagnetic induction](#).

Q: What does the wireless charging option for Nook include?

A: Two built in charging pads in the table and two ‘Airbridge’ orbs for phones without wireless charging technology inside.

Q: Which phones have wireless charging built-in?

A: An up to date list of wireless chargeable phones can be found [HERE](#).

Q: Can data and other cables be added?

A: Nook includes a generous cable trough and egress port at the rear of the table, exiting to the rear base of the Nook. The centre section of the cable port is removable. Customers can fit their own cables & connection points, or Nook can be supplied with these on demand.

Lighting

The overhead light is an RGB LED which can be colour and brightness controlled using the provided Remote Control. Use this to set the light colour of choice, control the dimness and decide if you wish to have the light cycle through the colour range. Please also be aware that the cable box through which the cables for the PDU travel has a removable cover. Should anything accidentally be dropped through the cable aperture in the desktop, this can be retrieved by removing this cover panel.

Seating

The Nook seats are completely removable and most standard canteen style seats can be positioned in the Nook instead. This is often used to create a bench gallery for 4 people to sit ‘at’ the Nook while two people sit inside, say for example for an interview or presentation. Some examples of these alternate seating arrangements can be seen in the Nook brochure.

Rear Wall Configuration

Both lower and upper rear wall panels can easily be added/removed using an Allen Key, by undoing 4 bolts in each. Please ensure to use two people to carry out any changes in the Nook and handle the parts carefully to ensure no dropping of heavy components. Some customers prefer to remove the upper rear wall if the Nook is being placed by a window and natural light is available.

Other features of Nook to be aware of

- Put nooks together to make a meeting/socialising tunnel
- Euro, UK and US plugs all work in the desk top sockets
- USB ports included
- Cables all hidden
- Seat cushion cover is removable for washing
- All fabric material is highest flame retardant rating (same as used in public transport)
- Structural shell material is Egger Eurodekor + MDF
- Overhead light is colour adjustable with an infra-red remote control
